

# Bill Hook

For lopping of branches, cutting of shrubs and other hard vegetative material.

# Budding Knife

For the budding operation, cutting of scion stick, defoliation of leaves and removing or cutting of unwanted thin twigs of the plants.

# Patch budding Knife

For the patch, flute and ring budding operation especially for removing the bud patches of same size from stock and scion

# Grafting Knife

For cutting and defoliation of scion stick, making of chisel point and 'V' grooves for grafting and slashing of thin twigs and for general-purpose cutting.

# Budding and Grafting Knife

For budding and grafting in vegetables and fruit gardens. The knife is also used for cutting of thin unwanted twigs, defoliation of leaves and general cutting works in nurseries and orchards.

# Secateur

For cutting of the unwanted branches or twigs of the orchard tree, vines, scion sticks, defoliation etc..

# Hedge Shear

The hedge shear is used for pruning and trimming of hedge and giving it desired shape. It is also used for cutting of shrubs and removing of haphazard growth in gardens and lawns.

# Lopping Shear

For pruning and cutting of branches and twigs of the orchard trees in standing position, which are beyond the reach, and capacity of pruning secateur

# Forester's Shear

To prune the medium sized branches  
(4 - 8cm) which are at higher height  
on the trees

# Grass Shear

For trimming of the grass in the lawn. It is also used for side dressing of the lawn and cutting of the soft vegetative material

# Flower Scissors

For cutting flowers with stems and other soft vegetative materials.

# Lawn Mower

For cutting grass in lawns and fields

# Crow Bar

For digging holes or pits for  
planting and fencing

# Hand Wheel Hoe with Three Tines

For intercultural practices in row  
crops / vegetables

# Garden Hoe

For hoeing, weeding, aerating  
and leveling the soil.

# Dutch Hoe

For hoeing between seedlings,  
plants & shrubs

# Shovels

Round point used primarily for digging holes

Square point used for picking up trash and debris

# Trowel

For uplifting the seedlings from beds  
along with root ball and transplanting

# Hand Cultivator

For Loosening soil in beds and  
flower boxes

# Weeding Fork

For removing weeds from the field from the field and also used for digging bulb crop.

# Digging Fork

For digging unprepared ground and turning of soil

# Wire Hand Rake

For raking dry leaves, weeds &  
grass cuttings

# Grass Sword

To cut jungle grass and bushes

# Hedge Trimmer

Both sided blade type suitable for trimming of hedges.

# Chain Prunner

Prunning of tree branches

# Pickaxe

For digging and loosening of hard  
and compact soil

# Spade

To dig or loosen ground, or to break up lumps in the soil also used for lifting, and moving bulk materials, such as soil, manures

# Sickle

For weeding and cutting the grasses

Harvest of leafy vegetables

# Dibbler

To making holes in soil for sowing bigger seeds and planting of seedlings/slips/cuttings

# Garden Rake

Loosening of soil of nursery beds,  
collection of stubbles

# Tree Prunner

To prune the tree branches at more height

# Wheel Barrow

To transport manures, soil, seedlings, garden waste, etc.

# Prunning saw

Prunning of thick and woody  
branches of trees and shrubs

# Water Can

For watering the plants and nursery beds

# Garden Axe

To cut undesired, unwanted, dead and diseased branches of trees

# Knapsack Sprayer

Spraying of agrochemicals

# Ganesh Sprayer

Spraying of agrochemicals on small scale nurseries, potted plants

# Gator Pump

Foot operated sprayer for spraying of agrochemicals on tall trees/orchards

# Sprinkler

Irrigation to garden / lawn

# Khurpi

Weeding and stirring the soil in the  
pots and beds

# Trenching Hoe

Opening of trenches, irrigation purposes and light collection of soil

# Weed cutter

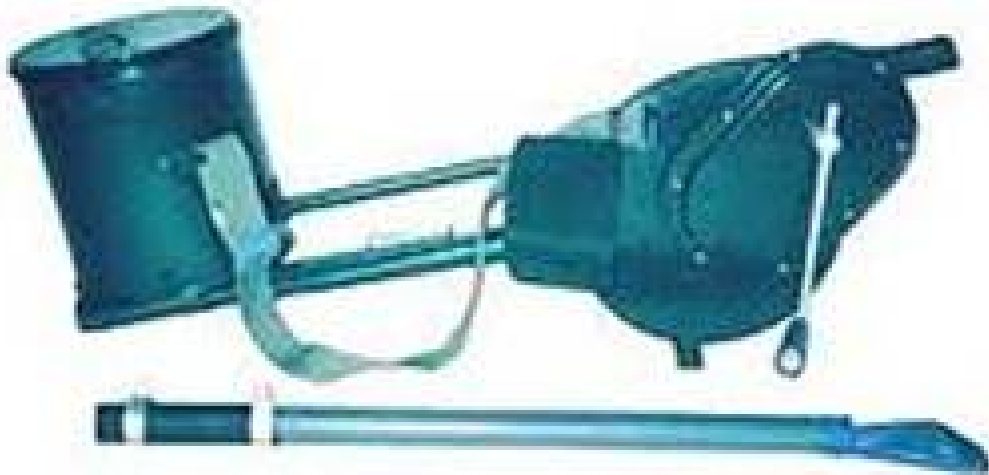

Weed removal/ cutting

# Dripper/Emitter

Irrigation to garden / lawn

# Hand Rotary Duster

Dusting the pesticidal and fungicidal  
dust on plants

# HTP Pumpset

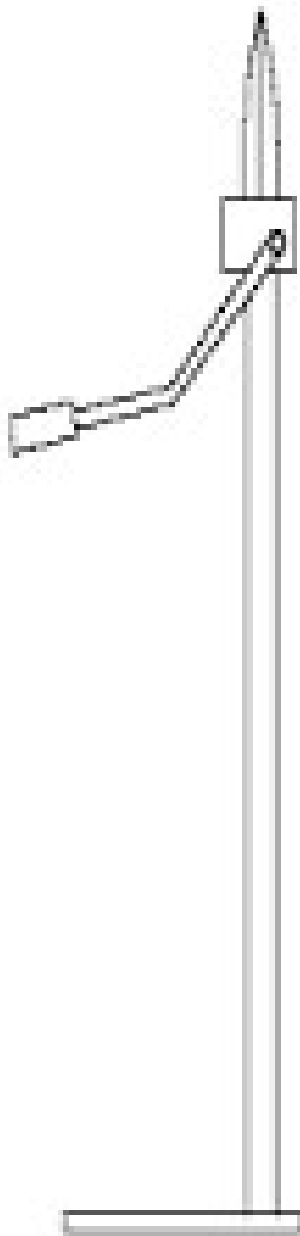

Type of power operated sprayer used  
for spraying agrochemicals on larger  
areas with uniform speed

# Foot Sprayer

Spraying of agrochemicals on garden crops and high-up plants like fruit trees and plantation crops

# Coconut Dehusker

Separation of coconut husk

# Coconut palm climber

Climbing on a coconut palm to  
harvest coconuts

# Mango Harvester

Harvesting mangoes from trees
