1) Precision Agriculture, Concept, tools & techniques

Q. 1.	Fill in the blanks.		
a)	Precision agriculture also known as crop management.	agriculture as needed farming &site specific	
b)	The concept of precision is strictly based or	·	
c)	The goal of grid soil sampling is to generate	e a map of nutrients and water requirement whiled	
d)	In India overall fertilizer consumption rate	_ ~~~	
e)	as a system for capturing, storing, which are spatially referenced to earth.	checking, manipulating, analyzing displaying data	
Q. 2.	Match the pairs.	12	
a)	Sensor technology	i)Grain flow sensor	
b)	Uncorrected GPS signal accuracy	ii)To measure humidity, vegetation etc.	
c)	PLF system	iii)Fertilizer & pesticide application	
d)	VRT technique	iv)Information about livestock	
e)	Yield monitor	v)3Q9Teet	
Q. 3.	True or false.	74	
n)	The unique character of GPS is precision in	time and space.	
b)	GPS systems help users to record positional information with an accuracy between 10 to 0.1m.		
c)	Mass flow sensors works on principal of transmitting beams of microwave energy		
d)			
	Seeding/sowing critical stage in configrowi	77	
c) Q. 4.	Precision farming can be utilized in every crop.		
a)	i)Increases	f soil sampling butthe intensity of sampling ii)Decreases	
	iii)Remain con	iv)none of the above	
b)	BMPS stands for	Trypolic of the more	
	i)Bad Management Practice	ii)Best management Practice	
	iii)Brief Management Practice	iv)Brief Management process	
c)	Which of the following is correct sentence		
	Precision farming deals with		
-	ADecrease productivity with decreasing	ii)Decrease productivity with increasing	
25	Oproduction cost.	production cost.	
ν,	iii)Increase productivity with increasing	 iv)Increase productivity with decreasing production cost. 	
d)	production cost	lecision making policy formulation policy.	
u,	DGIS	ii) Geo-information	
	iii) Agro-geoinformation	ivGPS	
c)	Which of the following is automatic techno		
47	i)GIS	ii)GPS	
	iii)VRT	iv)None	

Course Title: Geo-informatics and Nanotechnology and Precision Farming Q. 5. Do as directed Give long form of i)SSCM, ii)DGPS a) b) Write use of DGPS What are the two steps of precision farming? c) d) Define Precision agriculture. CTALSANDE Give any two comments of precision farming. e) n Give any two applications of geo-informatics. Ans Key: 0.1. Satellite a) **GPS** Application map c) 84.3 kg/ha d) Geographic information system c) Q. 2. Q. 3. Truc a) h) V) False (100 to 0.01m) h) c) iv) True c) iv) d) iii) d) True iii) False (can not used in eachy trop) c) e) iii) Q. 5. i)Site Specific Crop Management ii)Differential Global Positioning System Precise location of activities h) 1)Identification & assessment of variability 2) Management of Variability. Precision agriculture is technique of applying right amount inputs at right location at right time to enhance production. c) GIS, GPS. ikrop yield management in pest and disease management.

2) Geo-informatics system- Concept, tools & techniques

Q. 1.	Fill in the blanks.		
a)	helps to conversion of raw data of GIS into maps		
b)	&are forms of geo-spatial data		
c)	The imperine file format originally consted by		
d)	A popular public domain raster data is the	6	
e)	define the range of distinct value	the Raster can store	
Q. 2.	Match the pairs.		
a)	.dbf	the Raster can store i) Attribute index ii) Attribute information iii)Spatial index iv)Feature geometry.	
b)	shp	ii) Attribute information	
c)	.shx	iii)Spatial index	
d)	.ain	iv)Feature geometry	
c)	.sbn	v)Feature geometry odex	
Q. 3.	True or false.	C. 7	
a)	Geographical data describe Building	\sim	
b)	GIS is computer based tool	2 1	
c)	GIS helps to make maps	.12	
d)	GIS have ability to link data sets together by	veographically	
e)	Raster are in parts and define by their pixel		
Q. 4.		_	
n)	Choose correct option. a) Mapmakers use GIS to	*	
250	i)store geographical information	ii)use geographical information	
	iii)view geographical information	iv)store .use & view geographical information	
b)	The information GIS entered and stored as	1131	
	i)panels iii)single panel	ii)layers iv)dual punel	
:)	The users Use OlSvo	Trystain paner	
	i)complex analysisonly	ii) Display maps only	
	iii)complex analysis and display maps	iv)none of above	
1)	GIS deals which kind of data	II)Pi	
	i) Numerical iii)spathal	ii)Binary iv) complex	
•)	Spatial Data also called as	11) Complex	
C	Geodatabase	ii)Mono database	
> <	dii) current Data base	iv)None of above	
1,5.	Do as directed		
1)	Write down any one use of GIS?		
)	Full Form Of GIS?		
:)	Write down three main system of GIS?		
i)	Write down component of GIS?		
)	Define GIS ? Define Geo-spatial Data ?		

	Course Title: Geo-informa	ities and Na	notechnology and Precision Farming
Ans	Key:		
Q. I			
a)	GIS software		
b)	Raster based & vector base	rd	
c)	ERDAS	35()	
d)	GeoTIFF		
c)	Pixel depth		9.4 iv b) ii SAMPÉ
Q. 2	L. Q.	.3.	Q.4. \(\sqrt{\sqrt{\gamma}}\)'
a)	ii a)	True	a) iv
b)	iv b)	True	b) ii
c)	v c)	True	c) iii S
d)	i d)	True	d) jii
c)	iii e)	True	6) (1)
Q. 5	5.		```
a)	Used in map making		\mathbf{C}
b)	Geographical Information:	System	>
c)		atabase man	agementsystem, Visualization & reporting
d)	Software Mandages Specia	al databasa	Designation Europeico
e)	Software, Hardware, Spatia		
-,			Sy computer system build to capture, store, ay all kinds of spatial or geographical data.
F)			al aspect to it, or positioning is called as
1,	geospatial data	e de la	an aspect to it, or positioning is called as
	geo-pariar cana	ASIL	
	~	70	
	CU		ion & yield monitoring
Q. 1	. Fill in the blauk		
a)	is an important step	for developme	nt and management of crop monitoring systems
b)	Most valuable sources of spar	tial data for pr	ecision agriculture is
c)	The ratio of the actual yield to	o the field ave	rage is called as
d)	is essential in div	riding a large !	farm into management zones.
Q,	can be used to de	velop digital i	naps that transform spatial information.
Q. 2	2. Match the pairs.		
a)	Yield mapping		i)Graphic document
b)	Grain flow sensor		ii)Satellite signal
c)	GPS antenna		iii)Georeferenced data
	Prepared by Prof. 5	S. R. Sury	avanshi, DYP AC Talsande

	Course Title: Geo-informatics	and Nanotechnology and Precision Farming
d)	Travel speed sensor	iv) Grain volume
c)	Soil mapping	v)GPS receiver
Q. 3.	True or false.	
a)	Travel speed is measured with a u	altrasonic sensor.
b)	Yield maps cannot be used in pre-	cision agriculture.
c)	GPS is used for calculating yield	at each location.
d)	Soil mapping provides a structure across the landscape.	d representation of knowledge about the distribution of soil crop production.
c)	Yield maps represent the input of	crop production.
Q. 4.	Choose correct option.	N. C.
a)	Yield monitoring equipment was	
	i) 1999	ii)2000 🗘
	iii)1992	iv)1990
b)	Which sensor is used by some measurements.	e mapping system to improve accuracy of grain flor
	i) Grain moisture sensor	clean grain elevator speed sensor
	iii) Grain flow sensor	iv)Travel speed sensor
c)	Typical values of grain crops rang	ros from
	i) 10-12 sec 10	ii) 15-16 sec
	iii) 14-16 sec	iv) 18-20 sec
d)	is powerful ser of tools	for collecting, storing, and retrieving the data.
	i) Precision agriculture	ii) Yield monitoring
	iii) GIS 🗨	iv) GPS
e)	Automated farm machineries are	operated with the help of
	W SVM	ii) NGIS
~í°	Oii) MLC	iv) SSNM
₩5.	Do as directed	
a)	Define yield mapping.	
b)	Which sensor distinguishes measurement	urements logged during turns.
c)	Define soil mapping.	

Course Title: Geo-informatics and Nanotechnology and Precision Farming Which system is used to operating automated farm machineries. d) Write full form of NDVI. c) Which map is one of the most valuable sources of spatial data for precision agriculture. Ans Key: G.TALSANDÉ Q. 1. Crop discrimination Yield map Normalized yield Remote sensing GIS software c) Q. 2. Q. 3. Georeferenced data Grain volume False Clean grain elevator speed sensor Satellite signal 10-12 sec GPS receiver GIS Graphic document NGIS 0.5. It is the process of collecting georeferenced data on crop yield and characteristics (such as moisture content, while the crop is being harvested.

- Header position sensor.
- It is an approximation of the reality of the land, and one whose accuracy increases at higher densities of observation and more detailed scales.
- NOIS (Navigation Geographic Information system)

Normalized Difference Vegetation Index.

Yield map.

6) Remote sensing- Concepts, applications

Data provides the actual synoptic view of large area at a time. The collection of information relating to object without being physical contact with them is called as The full form of GIS		Fill in the blanks.		
called as The full form of GIS and GPS	a)	Data provides the actual synoptic view of large area at a time.		
Map maker is called as Q. 2. Match the pairs. a) Passive Sensor b) Active Remote Sensing c) Cartographer d) Microwave Sensing e) GIS v) Vy long Wavelength Q. 3. True or false. a) Sound waves are used in sonar types of remote sensing. b) Radar is used to detect things under vary. c) Radar is example if active remote varying. d) Remote sensing is not good to the when comparing an area after tsunami and then after tsunami e) Passive sensor detects artificial radiation that is emitted or reflected by the object. Q. 4. Choose correct option. a) A Map maker is called as i) Cartographer ii) Geographer iii) Photographer iii) Photographer iii) Photographer iii) Map quester The tast-time Remote sensing were ii) Paintings From air halloon iii) Sketches from french map maker c) Paintings From air halloon iii) Sketches from french map maker ii) Infra-red iii) Infra-red iii) Infra-red iii) Infra-red iii) Infra-red iii) Infra-red iii) Radar iii) Infra-red iii) Passive sensor iii) Active Remote sensing	b)			
Map maker is called as Q. 2. Match the pairs. a) Passive Sensor i) Map maker b) Active Remote Sensing ii) Infra-red d) Microwave Sensing iii) Geographic Information System d) Microwave Sensing iv) RADAR e) GIS v) vy long Wavelength Q. 3. True or false. a) Sound waves are used in sonar types of remote sensing. b) Radar is used to detect things under water. c) Radar is example if active remote wasting. d) Remote sensing is not good to the when comparing an area after tsunami and then after tsunami e) Passive sensor detects artificial radiation that is emitted or reflected by the object. Q. 4. Choose correct option. a) A Map maker is called as i) Cartographer ii) Potographer iii) Geographer iv) Map quester The tast-time Remote sensing were ii) Paintings From air halloon ii) TV remote control iii) Sketches from french map maker iv) aerial photos c) Sound waves are used in what type a of remote sensing i) Radar iii) microwave iv) sonar that sensing is used under water to detect things i) Infra-red iii) Radar iii) Infra-red iii) Radar iii) Infra-red d) What sensing is used under water to detect things i) Infra-red iii) Radar iii) sonar e) Types of remote sensing i) Passive sensor iii) Active Remote sensing	c)			
Map maker is called as Q. 2. Match the pairs. a) Passive Sensor i) Map maker b) Active Remote Sensing ii) Infra-red d) Microwave Sensing iii) Geographic Information System d) Microwave Sensing iv) RADAR e) GIS v) vy long Wavelength Q. 3. True or false. a) Sound waves are used in sonar types of remote sensing. b) Radar is used to detect things under water. c) Radar is example if active remote wasting. d) Remote sensing is not good to the when comparing an area after tsunami and then after tsunami e) Passive sensor detects artificial radiation that is emitted or reflected by the object. Q. 4. Choose correct option. a) A Map maker is called as i) Cartographer ii) Potographer iii) Geographer iv) Map quester The tast-time Remote sensing were ii) Paintings From air halloon ii) TV remote control iii) Sketches from french map maker iv) aerial photos c) Sound waves are used in what type a of remote sensing i) Radar iii) microwave iv) sonar that sensing is used under water to detect things i) Infra-red iii) Radar iii) Infra-red iii) Radar iii) Infra-red d) What sensing is used under water to detect things i) Infra-red iii) Radar iii) sonar e) Types of remote sensing i) Passive sensor iii) Active Remote sensing	d)	Sensor detects natural radiation that	is emitted or reflected by the object	
b) Active Remote Sensing ii) Infra-red c) Cartographer iii) Geographic Information System d) Microwave Sensing iv) RADAR e) GIS v) way long Wavelength Q. 3. True or false. a) Sound waves are used in sonar types of remote sensing. b) Radar is used to detect things under the comparing an area after tsunami and then after tsunami e) Remote sensing is not good to see when comparing an area after tsunami and then after tsunami e) Passive sensor detects artificial radiation that is emitted or reflected by the object. Q. 4. Choose correct on the comparing an area after tsunami and then after tsunami e) Passive sensor detects artificial radiation that is emitted or reflected by the object. Q. 4. Choose correct on the comparing an area after tsunami and then after tsunami e) Passive sensor artificial radiation that is emitted or reflected by the object. Q. 4. Choose correct on the comparing an area after tsunami and then after tsunami e) Photographer is minuted or reflected by the object. Q. 4. Choose correct on the comparing an area after tsunami and then after tsunami e) Photographer ii) Photographer iii) Photographer iii) Photographer iii) Photographer iii) Photographer iii) Tv remote control iii) Sketches from french map maker iii) Tv remote control iii) Sketches from french map maker iii) Infra-red iii) Infra-red iii) Infra-red iii) Infra-red iii) Infra-red iii) Radar iii) Infra-red iii) Radar iii) Infra-red iii) Geographer iii) Radar iii) Nactive Remote sensing i) Passive sensor iii) Active Remote sensing	c)	Map maker is called as	, A	
b) Active Remote Sensing ii) Infra-red c) Cartographer iii) Geographic Information System d) Microwave Sensing iv) RADAR e) GIS v) way long Wavelength Q. 3. True or false. a) Sound waves are used in sonar types of remote sensing. b) Radar is used to detect things under the comparing an area after tsunami and then after tsunami e) Remote sensing is not good to see when comparing an area after tsunami and then after tsunami e) Passive sensor detects artificial radiation that is emitted or reflected by the object. Q. 4. Choose correct on the comparing an area after tsunami and then after tsunami e) Passive sensor detects artificial radiation that is emitted or reflected by the object. Q. 4. Choose correct on the comparing an area after tsunami and then after tsunami e) Passive sensor artificial radiation that is emitted or reflected by the object. Q. 4. Choose correct on the comparing an area after tsunami and then after tsunami e) Photographer is minuted or reflected by the object. Q. 4. Choose correct on the comparing an area after tsunami and then after tsunami e) Photographer ii) Photographer iii) Photographer iii) Photographer iii) Photographer iii) Photographer iii) Tv remote control iii) Sketches from french map maker iii) Tv remote control iii) Sketches from french map maker iii) Infra-red iii) Infra-red iii) Infra-red iii) Infra-red iii) Infra-red iii) Radar iii) Infra-red iii) Radar iii) Infra-red iii) Geographer iii) Radar iii) Nactive Remote sensing i) Passive sensor iii) Active Remote sensing	Q. 2.	Match the pairs.	, 51	
b) Active Remote Sensing ii) Infra-red c) Cartographer iii) Geographic Information System d) Microwave Sensing iv) RADAR e) GIS v) toy long Wavelength Q. 3. True or false. a) Sound waves are used in sonar types of remote sensing. b) Radar is used to detect things under tow. c) Radar is example if active remote towning. d) Remote sensing is not good to use when comparing an area after tsunami and then after tsunami e) Passive sensor detects artificial radiation that is emitted or reflected by the object. Q. 4. Choose correct onton. a) A Map maker is called as i) Cartographer iii) Geographer iii) Geographer iv) Map quester b) The Liesttime Remote sensing were ii) Paintings From air balloon iii) TV remote control iii) Sketches from french map maker iv) aerial photos c) Sound waves are used in what type a of remote sensing ii) Radar iii) Infra-red iii) Infra-red iii) Infra-red iii) Infra-red iii) Infra-red iii) Sensire sensing ii) Passive sensor iii) Active Remote sensing ii) Passive sensor iii) Active Remote sensing ii) Active Remote sensing	a)	Passive Sensor	i) Map maker	
d) Microwave Sensing iv) RADAR GIS vivil long Wavelength Q. 3. True or false. a) Sound waves are used in sonar types of remote sensing. b) Radar is used to detect things under volve. c) Radar is example if active remote sensing. d) Remote sensing is not good to use when comparing an area after tsunami and then after tsunami e) Passive sensor detects at initial radiation that is emitted or reflected by the object. Q. 4. Choose correct on thicial radiation that is emitted or reflected by the object. Q. 4. Choose correct on thicial radiation that is emitted or reflected by the object. Q. 4. Choose correct on thicial radiation that is emitted or reflected by the object. D. 4. Choose correct on thicial radiation that is emitted or reflected by the object. Q. 4. Choose correct on thicial radiation that is emitted or reflected by the object. D. 4. Choose correct on thicial radiation that is emitted or reflected by the object. D. 5. Choose correct on thicial radiation that is emitted or reflected by the object. D. 6. Choose correct on thicial radiation that is emitted or reflected by the object. D. 6. Choose correct on thicial radiation that is emitted or reflected by the object. D. 6. Choose correct on thicial radiation that is emitted or reflected by the object. D. 6. Choose correct on the object. D. 7. Typenote control in the object. D. 7. Typenot	b)	Active Remote Sensing		
c) GIS v) Vey long Wavelength Q. 3. True or false. a) Sound waves are used in sonar types of remote sensing. b) Radar is used to detect things under voir. c) Radar is example if active remote voising. d) Remote sensing is not goodale use when comparing an area after tsunami and then after tsunami e) Passive sensor detects artificial radiation that is emitted or reflected by the object. Q. 4. Choose correct option. a) A Map maker is called as i) Cartographer ii) Photographer iii) Geographer iii) Geographer iv) Map quester b) The Institute Remote sensing were i) Paintings From air balloon ii) TV remote control ii) Sketches from french map maker iv) aerial photos c) Sound waves are used in what type a of remote sensing i) Radar ii) microwave iii) Infra-red iv) sonar d) What sensing is used under water to detect things i) Infra-red ii) Radar iii sonar iv) Microwave e) Types of remote sensing i) Passive sensor iii) Active Remote sensing ii) Passive sensor iii) Active Remote sensing	c)	Cartographer	iii) Geographic Information System	
Q. 3. True or false. a) Sound waves are used in sonar types of remote sensing. b) Radar is used to detect things under vote. c) Radar is example if active remote voising. d) Remote sensing is not good to use when comparing an area after tsunami and then after tsunami e) Passive sensor detects artificial radiation that is emitted or reflected by the object. Q. 4. Choose correct option. a) A Map maker is railed as i) Cartographer ii) Photographer iii) Photographer iii) Geographer iv) Map quester b) The first-time Remote sensing were i) Paintings From air balloon ii) TV remote control iii) Sketches from french map maker iv) aerial photos c) Sound waves are used in what type a of remote sensing i) Radar iii) Infra-red iii) Infra-red iv) sonar d) What sensing is used under water to detect things i) Infra-red iii) Radar iii) Radar iii) Radar iii) Radar iii) Sonar v) Microwave Types of remote sensing i) Passive sensor iii) Active Remote sensing	d)	Microwave Sensing	iv) RADARY	
Sound waves are used in sonar types of remote sensing. Radar is used to detect things under valve. Radar is example if active remote valving. Remote sensing is not good to the when comparing an area after tsunami and then after tsunami Passive sensor detects artificial radiation that is emitted or reflected by the object. Q. 4. Choose correct option. A Map maker is called as i) Cartographer ii) Geographer iii) Geographer iii) Geographer iv) Map quester The institute Remote sensing were i) Paintings From air balloon ii) TV remote control iii) Sketches from french map maker iv) aerial photos c) Sound waves are used in what type a of remote sensing i) Radar ii) Infra-red iii) Infra-red iii) Infra-red iii) Radar iiii sonar iv) Microwave Types of remote sensing ii) Passive sensor iii) Active Remote sensing	c)	GIS	v) V long Wavelength	
Radar is used to detect things under the comparing an area after tsunami and then after tsunami estable sensing is not good to use when comparing an area after tsunami and then after tsunami estable sensor detects artificial radiation that is emitted or reflected by the object. Q. 4. Choose correct option. a) A Map maker is valled as i) Cartographer ii) Photographer iii) Geographer iv) Map quester b) The travetime Remote sensing were i) Paintings From air balloon ii) TV remote control iii) Sketches from french map maker iv) aerial photos c) Sound waves are used in what type a of remote sensing i) Radar ii) Infra-red iii) Infra-red iii) Infra-red iii) Infra-red iii) Radar iii sonar iv) Microwave Types of remote sensing i) Passive sensor iii) Active Remote sensing	Q. 3.	True or false.	5	
c) Radar is example if active remote sensing. d) Remote sensing is not good to use when comparing an area after tsunami and then after tsunami e) Passive sensor detects artificial radiation that is emitted or reflected by the object. Q. 4. Choose correct option. a) A Map maker is called as i) Cartographer iii) Geographer iii) Geographer iv) Map quester b) The lieu time Remote sensing were i) Paintings From air balloon ii) TV remote control iii) Sketches from french map maker iv) aerial photos c) Sound waves are used in what type a of remote sensing i) Radar ii) Infra-red iii) Infra-red iii) Infra-red iii) Infra-red iii) Radar iii sonar iv) Microwave c) Types of remote sensing i) Passive sensor iii) Active Remote sensing ii) Active Remote sensing	a)	Sound waves are used in sonar types of remote sensing.		
Remote sensing is not good to use when comparing an area after tsunami and then after tsunami e) Passive sensor detects artificial radiation that is emitted or reflected by the object. Q. 4. Choose correct option. a) A Map maker is called as i) Cartographer ii) Geographer iii) Geographer iii) Geographer iii) Map quester b) The list-time Remote sensing were i) Paintings From air balloon ii) TV remote control ii) Sketches from french map maker iv) aerial photos c) Sound waves are used in what type a of remote sensing i) Radar ii) microwave iii) Infra-red ii) Infra-red iii) sonar iii) Radar iii sonar iii) Radar iii) Radar iii sonar iii) Radar iii) Radar iii sonar iii) Radar iii sonar iii) Radar iii) Radar iii sonar iii) Radar iiii sonar iii) Radar		Radar is used to detect things under Chr.		
e) Passive sensor detects artificial radiation that is emitted or reflected by the object. Q. 4. Choose correct option. a) A Map maker is railed as	b)	Radar is used to detect things under water		
Q. 4. Choose correct option. a) A Map maker is called as i) Cartographer iii) Geographer iii) Geographer iii) Map quester b) The first time Remote sensing were i) Paintings From air balloon ii) TV remote control iii) Sketches from french map maker iv) aerial photos c) Sound waves are used in what type a of remote sensing i) Radar ii) microwave iii) Infra-red iii) Infra-red iii) sonar d) What sensing is used under water to detect things i) Infra-red iii sonar iv) Microwave e) Types of remote sensing i) Passive sensor ii) Active Remote sensing	.5	- GY	f	
a) A Map maker is called as i) Cartographer ii) Photographer iii) Geographer iv) Map quester b) The first time Remote sensing were i) Paintings From air balloon ii) TV remote control ii) Sketches from french map maker iv) aerial photos c) Sound waves are used in what type a of remote sensing i) Radar ii) microwave iii) Infra-red iv) sonar d) What sensing is used under water to detect things i) Infra-red ii) Radar iii sonar iv) Microwave e) Types of remote sensing i) Passive sensor iii) Active Remote sensing	c)	Radar is example if active remote Shring		
i) Cartographer iii) Geographer iii) Geographer iv) Map quester The first-time Remote sensing were i) Paintings From air balloon ii) TV remote control iii) Sketches from french map maker iv) aerial photos c) Sound waves are used in what type a of remote sensing i) Radar ii) microwave iii) Infra-red iv) sonar d) What sensing is used under water to detect things i) Infra-red iii sonar iv) Microwave e) Types of remote sensing i) Passive sensor iii) Active Remote sensing	c) d)	Radar is example if active remote sensing Remote sensing is not good to use when c	comparing an area after tsunami and then after tsunami	
i) Cartographer iii) Geographer iii) Geographer iv) Map quester b) The transtime Remote sensing were i) Paintings From air balloon ii) TV remote control iii) Sketches from french map maker iv) aerial photos c) Sound waves are used in what type a of remote sensing i) Radar ii) microwave iii) Infra-red iv) sonar d) What sensing is used under water to detect things i) Infra-red iii sonar iv) Microwave e) Types of remote sensing i) Passive sensor ii) Active Remote sensing	c) d) e)	Radar is example if active remote ansing Remote sensing is not good to use when of Passive sensor detects artificial radiation to	comparing an area after tsunami and then after tsunami	
iii) Geographer iv) Map quester The first time Remote sensing were i) Paintings From air balloon ii) TV remote control iii) Sketches from french map maker iv) aerial photos Sound waves are used in what type a of remote sensing i) Radar ii) microwave iii) Infra-red iv) sonar d) What sensing is used under water to detect things i) Infra-red iii sonar iv) Microwave e) Types of remote sensing i) Passive sensor iii) Active Remote sensing	c) d) e) Q. 4.	Radar is example if active remote sensing Remote sensing is not good to use when of Passive sensor detects artificial radiation of Choose correct option.	comparing an area after tsunami and then after tsunami	
b) The bastime Remote sensing were i) Paintings From air balloon ii) TV remote control iii) Sketches from french map maker iv) aerial photos c) Sound waves are used in what type a of remote sensing i) Radar ii) microwave iii) Infra-red iv) sonar d) What sensing is used under water to detect things i) Infra-red iii sonar iv) Microwave e) Types of remote sensing i) Passive sensor ii) Active Remote sensing	c) d) e) Q. 4.	Radar is example if active remote consing Remote sensing is not good to use when of Passive sensor detects artificial radiation of Choose correct option. A Map maker is called as	comparing an area after tsunami and then after tsunami that is emitted or reflected by the object.	
ii) Sketches from french map maker iv) aerial photos Sound waves are used in what type a of remote sensing i) Radar ii) microwave iii) Infra-red iv) sonar d) What sensing is used under water to detect things i) Infra-red ii) Radar iii sonar iv) Microwave e) Types of remote sensing i) Passive sensor ii) Active Remote sensing	c) d) e) Q. 4.	Radar is example if active remote sensing Remote sensing is not good to use when of Passive sensor detects artificial radiation to Choose correct option. A Map maker is called as i) Cartographer	comparing an area after tsunami and then after tsunami that is emitted or reflected by the object. ii) Photographer	
ii) Sketches from french map maker iv) aerial photos Sound waves are used in what type a of remote sensing i) Radar ii) microwave iii) Infra-red iv) sonar d) What sensing is used under water to detect things i) Infra-red ii) Radar iii sonar iv) Microwave e) Types of remote sensing i) Passive sensor ii) Active Remote sensing	c) d) e) Q. 4.	Radar is example if active remote sensing Remote sensing is not good to use when of Passive sensor detects artificial radiation to Choose correct option. A Map maker is called as i) Cartographer	comparing an area after tsunami and then after tsunami that is emitted or reflected by the object. ii) Photographer	
c) Sound waves are used in what type a of remote sensing i) Radar ii) microwave iii) Infra-red iv) sonar d) What sensing is used under water to detect things i) Infra-red iii sonar iv) Microwave e) Types of remote sensing i) Passive sensor ii) Active Remote sensing	c) d) e) Q. 4.	Radar is example if active remote sensing Remote sensing is not good to use when of Passive sensor detects artificial radiation of Choose correct option. A Map maker is called as i) Cartographer iii) Geographer The first time Remote sensing were	comparing an area after tsunami and then after tsunami that is emitted or reflected by the object. ii) Photographer iv) Map quester	
i) Radar iii) Infra-red iii) Infra-red iv) sonar d) What sensing is used under water to detect things i) Infra-red iii sonar iii sonar iv) Microwave e) Types of remote sensing i) Passive sensor ii) Active Remote sensing	c) d) e) Q. 4.	Radar is example if active remote whising Remote sensing is not good to use when o Passive sensor detects artificial radiation t Choose correct option. A Map maker is called as i) Cartographer iii) Geographer The first time Remote sensing were i) Paintings From air balloon	comparing an area after tsunami and then after tsunami that is emitted or reflected by the object. ii) Photographer iv) Map quester ii) TV remote control	
d) What sensing is used under water to detect things i) Infra-red iii sonar iii sonar iv) Microwave e) Types of remote sensing i) Passive sensor ii) Active Remote sensing	c) d) c) Q. 4. a)	Radar is example if active remote sensing Remote sensing is not good to use when of Passive sensor detects artificial radiation of Choose correct option. A Map maker is called as i) Cartographer iii) Geographer The first time Remote sensing were i) Paintings From air balloon ii) Sketches from french map maker	comparing an area after tsunami and then after tsunami that is emitted or reflected by the object. ii) Photographer iv) Map quester ii) TV remote control iv) aerial photos

c)	i)<4.3	ii)<4.1	
	iii)<4.5	iv)<3.9	
Q. 5.	Do as directed	11/0.5	
	Prepared by Prof. S. R. S	uryavanshi, DYP AC Talsande	

- a) Define soil testing.
- b) Give formula of NL
- c) What is the goal of sufficiency approach?
- d) Give full form of SSNM & DRIS.
- e) Define SSNM.
- Write critical limits of micronutrients.

Ans key:

Q. 1 Fill in the blanks.

- a) Soil testing
- b) Cate & Nelson
- c)>2.5
- d) recommendation of Ca, Mg.K
- e) Soil Test Crop Response

Q. 2 Match the pairs.

- a) List the nutrients in orde (Cimportance
- b) < 0.6
- c) Ca:k ratio is very high
- d)Ca,Mg,K
- e) to maintain soil fertility for future year

Q.3 True or False

- a) False
- b) True
- c) False
- d) True
- e) False

Q. 4 Choose correct option

Sufficiency approach

- b) <1.5
- c) Calcareous Soil
- d) Soil cum plant analysis
- e) <4.5

Q. 5 Do as directed

- a) Soil testing is the scientific diagnostic tool to evaluate soil fertility for recommending balanced nutrients to crops to achieve profitability, higher production, improving fertilizer use efficiency & reduces the environment pollution.
- b) Nutrient Index = (NLx1) + (NMx2) + (NHx3) /NT
- c) To maximize the profitability in a given years.
- d) SSNP- Site Specific Nutrient Management

DRIS- Diagnosis and Recommendation Integrated system

- e) SSNM is a new approach nutrient recommendation is mainly based on indigenous nutrient supply of the soil and nutrient demand of crop for achieving targeted yield.
- f) Fe- <4.5, Zn- <0.6, B- <0.05, Mn- <2.0, Cu- <0.2, Mo- <0.05.

12) Nanotechnology- Concepts and techniques

Q. 1.	Fill in the blanks.			
a)	A nanometer is the diameter of a h	uman pair.		
b)	is a multidisciplinary science.	and 12		
c)	One mole of water for instance weight	is_ gr.		
d)	Nanometer is conventionally definited	as		
e)	1 nanometer isof one metre.			
Q. 2.	Match the pairs.			
a)	Nanoscale	i) nano-gift		
b)	Nanoparticle	ii) 1 to 100nm		
c)	Seed	i) nano-gift ii) 1 to 100nm iii) 6.022×10^23		
d)	One mole of any material	iv)used to detect pathogens		
e)	Nanosensors	v) Arrangement into orded layers		
Q. 3.	True or false.	18		
a)	Nanotechnology isn't art and science of	of manipulating matter at the nanoscale.		
b)	Size of nanoparticle is 10 to 100nm	Q		
c)	In nanoparticle production two methods			
d)	Nano technology is a multi-disciplism	science.		
c)	Smart seed cannot be used for coming	ation.		
Q. 4.	Choose correct option.			
a)	Method of Nanoparticle production.			
	i) Bottom up	ii)down		
	iii) top up	iv)low		
b)	In bottom up method which types of si	teps.		
	i) punitjet	ii) perpendicular		
	(ii) rectangle type	iv) triangle

Q. 5. Do as directed

- a) Define nanoparticle.
- b) Give two drawback of bottom up approach of synthesis of nano particles
- Write two uses of nano material in agriculture c)
- DAR ACTALSAMDE d) Write two principle factor causes the properties of nano material to differ significantly from other materials
- Who give the idea of nanotechnology c)
- f) Which method is used for physical synthesis of metallic nanoparticles

Ans Key:

- Q. 1.
- Greek &dwarf
- Lithography
- Scanning probe microscopy c)
- Tunability
- TiO2 c)
- a)
- c)

- d)

0.5.

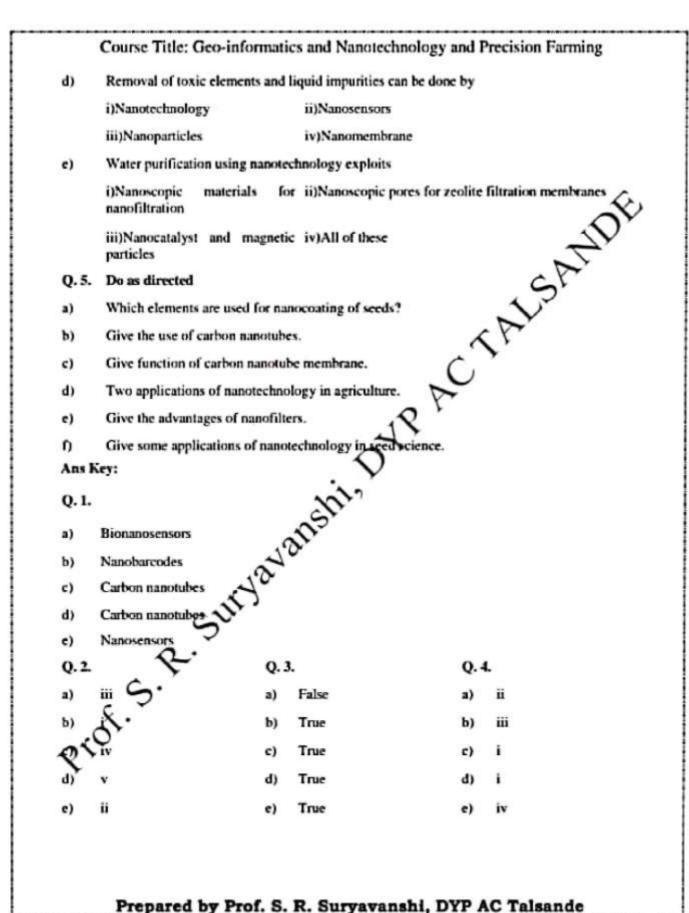

- Nanoparticle is defined as a particle of matter that is between 1 and 100 nm in diameter
- b) 1-contamination from precursor chemicals, 2-generation of hazardous by product
- Bio sensors for aqua culture, Analysis of gene expression and regulation, Nano sensors
- Increased relative surface area and quantum effect d)
- Theidea of nanotechnology was first time introduce in 1959 by Richard Feynman a physicist at ditech, Attrition and pyrolysis

Course Title: Geo-informatics and Nanotechnology and Precision Farming 14) Nano-pesticides, nano-fertilizers and nano-sensors Q. 1. Fill in the blanks. Nano fertilizers are nutrient carriers of nanodiamens ranging from __ to __. can be used to detect pathogens as well as micro and nano conditions in the field. act as a reservoir for nutrients that are slowly released on demand. c) have been developed as carriers of pesticides at low cost, for extended release and d) better contact with plants. c) is an object that has at least one dimension in nanometer scale. Q. 2. Match the pairs. i) Nutrient use efficiency Nano pesticide a) b) Encapsulation ii) Polymer film iii) Clay nanotubes Nano sensor Zeolite iv)Honey comb like structure d) Nano fertilizers v) Nano cantilevers c) O. 3. True or false. Nano fertilizers are ecofriendly in nature. a) Urea fertilized zeolite chips can be used as fast release nitrogen fertilizer. b) Nano pesticides will increase the rate of application. c) Zeolite holds nutrients in the roundine of plants to use when required. d) Nano fertilizers decreases the nutrient use efficiency. c) Q. 4. Choose correct optic CRF refers to (a) i) Continuous Releasing Fertilizer ii) Constant Rate of Fertilizer iii) Controlled Rate of Fertilizer iv) Controlled Release Fertilizers Nano sensors are used to detect b) i) Pulbagens ii) Temperature of soil iii) Perficide level of soil iv) All of these Nano fertilizers are nutrient carriers of nanodiamensions ranging from...) 10 to 20 nm ii) 30 to 40 nm iii) 15 to 30 nm iv) 20 to 30 nm can be used as slow released nitrogen fertilizer. i) Ammonium chloride ii) Both iii) Urea fertilized zeolite chips iv) None of these One mole of water for instance weights ___ gm. e) i) 10 ii) 18 iii) 20 iv) 15 Prepared by Prof. S. R. Suryavanshi, DYP AC Talsande

Q. 5. Do as directed Define Nano sensors. a) Name the nano fertilizer used as slow Release fertilizer in sulphur deficient soil. b) Give the full form of CDA. c) AS W. L. W. Give any two devices used as nanosensors. d) Give any two formulation types of nanopesticides. c) Give the full form of CRFs. n Ans Key: Q. 1. 30 to 40 nm Nanosensors Zeolite Clay nanotubes Nano-material e) Q. 2. Q. 3. iii) Clay nanotubes a) Fertilizer False (Urea femilized zeolite iv) All of these i) Polymer film b) can be used as slow release N fenilia(TD v) Nano cantilevers False of decrease the rate of ii) 30 to 40 nm c) application) iv) Honey comb like d) iii) Urea fertilized zeolite chips structure i) Nutrient use False (It increases the NUE) 18 gm c) c) efficiency O. 5. 'Nano-sensors' are any biological, chemical or surgical sensory points used to convey information about hadoparticles to macroscopic world. Sulphur Nano coating fertilizers CDA - Controlled Droplet Application Nanocantilevers, carbon nanotube, nanowires Formulation types of nanopesticides- Nanoemulsions, nanocapsules, c) Control Release Fertilizer. n

Course Title: Geo-informatics and Nanotechnology and Precision Farming

15)	Use of nanotechnology in se	eed and water for scaling up farm productivity
Q. 1.	Fill in the blanks.	
a)	Use of can help to alert th	ne pollen contamination.
b)	Tracking of sold seeds could to d	one with
c)	Full form of CNTs	
d)	to channelize the water from the	er permeation by penetration of seed coat and act are passes substrate into the seed.
e)	are used for analytica	detection of contaminants in water samples
Q. 2.	Match the pairs.	15,
a)	Nanocoating	i)Smart seed
b)	Natarajan and Siva Subramanian	ii)Quantum dots
c)	Nano filtration	iii)Zn,Mn.Pa.Pt.Au,Ag
d)	Nanosensors	iv)Carbon nanotubes and alumina fibers
e)	Su and Li	v)Titanium oxide nanowires or palladium nanoparticles
Q. 3.	True or false.	O'
a)	Conventional methods can clean	water by back flushing.
b)	Smart seeds reduce seed rate.	str.
c)	Carbon nanotubes can be used	acilitate germination in rainfed crops.
d)	Nanofibrius alumina filten pelps t	o remove negatively charged contaminants.
e)	Carbon nanotube membrane remo	oves water contaminants.
Q. 4.	Choose correct option.	
a)	CNTs stant for	
	i)Carbon nano technique	ii)Carbon nanotube
	(ii)Carbon nanotechnology	iv)All of these
b) c	Seeds imbibed with nanoencapsu	tions with specific bacterial strain called as
ζ,	i)Seed encapsulation	ii)Nano barcodes
	iii)Smart seed	iv)All of these
c)	Su and Li(2004) developed a tech	nique known as
	i)Quantum dots	ii)Nanotechnology
	iii)Nanoparticle technique	iv)Both (i) & (ii)

- Act permeation by penetration of seed coat and act as an esubstrate into the seeds.

 Ainds of water contaminants including turbidity, oil, bacteria, viruants.

 Alogy in seed science, Nanotechnology in water use

 Asy require less pressure to pass water across the filter, they are more efficient.

 Nanocoating of seeds, Nanobarcodes, Bionanosensors, Coatting seeds with nanomembrane, Carbon nanotubes.

 Act of the permeation by penetration of seed coat and act as an expense.

 Act of the permeation by penetration of seed coat and act as an expense.

 Act of the permeation by penetration of seed coat and act as a coattain and act as an expense.

 Act of the permeation by penetration of seed coat and act as a coattain to be seed to be seed as a coattain and act as a coa

16) Use of nanotechnology in fertilizer & plant protection for scaling up farm productivity

Q. 1.	Fill in the blanks.	
n)	Nanotechnology has provided the nanostructure material as controlled vector known as	
b)	Naturally occuring minerals having a honey comb like layered crystal structure known &	
c)	act as reservoir for nutrients that are slowly released on demand	
d)	Fertilizers can be coated with	that facilitate slow and steady release, of nutrients.
c)	are used for herbicide application which claim to include nano materials.	
Q. 2.	Match the pairs.	
a)	Nanosulfactant	i) smart fertilizer
b)	Nanomaterial	ii)40-70%
c)	Nitrogen	iii)50-90
d)	Phosphorus	iv) grahosate
e)	Controlled release Vector	nilon
Q. 3.	True or false.	\Diamond
n)	Smart fertilizers enhance nutrient use afficiency and increase cast of cultivation	
b)	Nanofertilizer and nanocomposites are excellent alternative to soluble fertilizer	
c)	Nano pesticide will reduce the ore of application	
d)	Size of CDA is(4-28 ump	
e)	CDA is controlled drople Applicant	
Q. 4.	Choose correct pulon.	
a)	controlled release vector known as	
	i) Smart Ruilizer	ii) complex fertilizer
b)	iii) fiixed fertilizer Nano-pesticide should be applied time	iv) simple fertilizer
E)	\$18-15	ii)20-25
.0	Dii)3-4	iv)5-10
D()	fertilizer with Sulphur nano coatings at	Control Prince Control
1	i) Slow release fertilizer	ii) fast release fertilizer
	iii) volatile fertilizer	iv) captan
d)	Nanosize fungicide is	
	i) mancozeb	ii) AXX
	iii) propiconazole	iv) carbendazim
c)	그 그 그 그 그 그 그 그 그 그 그 그 그 그 그 그 그 그 그	post-emergence application for grassy weeds
	i) pendimethalin	ii) fluchloralin
	iii) paraquat	iv) Atrazine
		uryavanshi, DYP AC Talsande

Q. 5. Do as directed

- clay nanotubes are also known as 2)
- CDA stands for b)
- Examples of Nano sized fungicide. c)
- Examples of Nano material which can be used as potential application. d)
- CMC stands for c)
- approach used to improve insecticidal value f)

Ans key:

Q. I.

- Smart fertilizer
- b) Zeolites
- Zeolites
- d) Nano membranes
- Adjuvants

c)

iii

c)

Q. 5.

- Halloysite
- Controlled supplet Application
- Banner M , AXX , Syngent
- Kpolin, Polymeric biocompatible NPs, Polymeric chitosan NPs d)
- boxy-methyl cellulose

Nanoencopsulation
